Editor

W. Kenneth Hamblin

Brigham Young University Geology Studies is published semiannually by the department. *Geology Studies* consists of graduate-student and staff research in the department and occasional papers from other contributors. *Studies for Students* supplements the regular issues and is intended as a series of short papers of general interest which may serve as guides to the geology of Utah for beginning students and laymen.

Preface

In preparing this index, the major classification emphasis has been on subject. The reference to each subject includes author, date of publication, volume, part number, and paging. Under a scientific name, the term DESCRIPTION indicates a new taxonomic group.

The second section of this index is an author-title listing and is arranged alphabetically by author.

Special acknowledgments are due the Harold B. Lee Library Administration for providing the time and the facilities for the preparation of this index. We express special thanks to John R. Taylor, Library Systems Analyst, whose computer programming and suggestions have facilitated the production of the index. Acknowledgments are also due Dr. Keith J. Rigby of the Brigham Young University Geology Department, and Mrs. Shauna Mason Patrick and Miss Kathryn Thomas, typists.
